SUMMARY

I'm a backend-first full-stack developer. I care about the parts users never see — clean data models, predictable APIs, permissions that hold up — and the parts they do. For about 3.8 years at Digicrome Pvt Ltd I've built and maintained Laravel applications that teams depend on daily: CRM and lead-management systems, internal business workflows, public websites and the APIs behind them.

EXPERIENCE

Software Developer — Digicrome Pvt Ltd

~3.8 years · Present

Laravel / full-stack developer owning features from database schema to deployment.

- **CRM & lead management:** Lead capture, assignment and tracking with stages, comments, activity history, role-based permissions and reporting dashboards.
- **Business workflows:** CRM, HRMS and ERP-style modules — approval flows, scheduled jobs, queued notifications and admin panels.
- **APIs & integrations:** RESTful APIs for web and mobile clients, third-party API integrations, webhooks and automation between systems.
- **Websites & landing pages:** Responsive Laravel + Blade websites with lead-generation forms, SEO fundamentals and performance tuning.
- **Deployment & production:** Linux / Ubuntu servers, Nginx and Apache, domains, DNS and SSL, AWS EC2 / S3 / IAM, and production troubleshooting.

TECHNICAL SKILLS

Backend	PHP, Laravel, RESTful API Development, Authentication & Authorization, MVC Architecture, Eloquent ORM, MySQL, Database Design & Query Optimization, Queue Jobs & Scheduled Tasks, Role-Based Access Control, CRM, HRMS & ERP Workflows, Third-Party API Integrations, Webhooks & Automation, Secure, Maintainable Architecture
Frontend	HTML5, CSS3, JavaScript, Blade Templates, Bootstrap 5, Responsive Web Design, jQuery, AJAX, UI/UX Implementation, React.js, Next.js (learning), Modern Animations & Interactive UI
Cloud & DevOps	Linux & Ubuntu, Nginx, Apache, Git & GitHub, Cloud Deployment, Server Configuration, Domain & DNS Configuration, SSL & HTTPS, Production Troubleshooting, Performance Optimization, AWS (EC2, S3, IAM), CI/CD Fundamentals (learning)
Mobile	Flutter (learning), Dart (learning), Cross-Platform App Development (learning), REST API Integration, Auth & Session Management, Mobile UI Development (learning), Backend Integration with Laravel, Push Notifications (learning)
Tools	Git, GitHub, Postman, Composer, npm, MySQL, phpMyAdmin, cPanel, Linux CLI, AI-Assisted Dev Tools

PROJECT WORK

CRM & Lead Management System

Production · company work (private)

A lead pipeline for sales teams: capture leads from forms and integrations, assign them to agents, move them through stages and keep a full activity trail.

Laravel · PHP · MySQL · Blade · jQuery / AJAX · Bootstrap 5

Business Websites & Landing Pages

Production · company work (private)

Responsive company websites and campaign landing pages built to convert — fast pages, clean markup and lead forms wired straight into the CRM.

Laravel · Blade · Bootstrap 5 · JavaScript · MySQL

Cloud-Hosted Web Applications

Ongoing responsibility

Taking Laravel applications from repository to running service: provisioning Ubuntu servers, configuring Nginx and PHP-FPM, SSL, DNS and keeping things healthy.

Ubuntu · Nginx · Apache · AWS EC2 / S3 · Git

React & Next.js Interfaces

Active learning & side projects

Component-driven frontends that consume Laravel APIs — reusable UI, responsive layouts and typed data fetching. This portfolio is one of them.

React · Next.js · TypeScript · Tailwind CSS

Flutter Mobile Applications

In development · growing skill

Cross-platform apps with login, sessions and API-connected screens backed by Laravel — one codebase for Android and iOS.

Flutter · Dart · Laravel API · REST
